

Employee communications takes a big step today with a new and improved employee Intranet Web site being made available to Oak Ridge Office Federal and support contractor employees. From service requests to phone directories, news items to an events calendar, the Intranet enables you to find in one place information and services which allows each of us to support our missions in science, environmental management and nuclear fuel supply.

Please take a look at the *ORO Intranet – The Daily Source for the Information You Need* at the site at <https://sharepoint.oro.doe.gov> and bookmark it for daily use on your computer. New and fresh content will be posted each day as our daily Employee News Update will now be available on the Intranet. And with the events calendar, you will be able to find out the latest activities that are of interest to the ORO workforce.

Comments on the site are welcomed as are items to be entered on the calendar, which should be directed to the Public Affairs Office at pao@oro.doe.gov. With each employee's use and contributions, the new ORO Intranet site will be a useful communications tool which combines services and reference materials for your daily use.
